

We listen to K Love which serves as a resident of the local community. The effect on the local community if K-LOVE were to be displaced by an LPFM broadcaster providing other programming would take away our ability to hear the station. This station offers family music and family talk and no commercials. We feel this allows our family to grow and to listen to proper music. If this was overrun with wild stations we would have no options. The service of K Love gives our community the option to raise a family listening to family options and surrounded with good values. Please do not take this away.
